Total work experience | Ready to start

10+ years | **4 weeks**

Main technologies

PHP 10+ yr.   **JavaScript** 8 yr.   **CakePHP** 5 yr.   **Vue.js** 5 yr.   **Symfony** 3 yr.

TypeScript 3 yr.   **React.js** 1 yr.   **Rust** 1 yr.

Open to roles

Full-stack Engineer   Back-end Engineer   Front-end Engineer   Software Architect

I'm very happy to be here, I like to play with new technologies or even older ones like assembly. As a developer, I try to keep a good relationship with computers, like two friends discussing future goals and smiling when we achieve something.

Work experience

Frontend engineering

Mar 2022 - present • 10 mos

[Friday Finance](#) • Remote

This is my first international career, it's very very incredible, here a need to do and guide sometimes the frontend and backend, we integrate with a lot of banks around the world, that's guides me to learn more and more all day's in this company.

Here we created our own design system with our own components what is amazing.

I created the suite tests of this company, logger manager, plugins for apollo, express, learn typescript like a boss.

Vue.js   Vuex   Apollo   GraphQL   TypeScript   Express   Node.js   Nuxt

Google Cloud   PostgreSQL

My own company for years

Jun 2011 - present • 11 yr 8 mos

Certoi

This is my personally company i worked here to create a lot of problem's to various companies size, integration with government tax service, management of accountant, restaurant management, i write a lot vanilla javascript, to you know more clear, dear reader, it's the time when we have to around the border of elements with images, and use table to define a lot of grid in our frontend, because even our clients supports modern browsers in this time.

So this place is a great place for me, here is the place that's i build everything i know, from C,C++,ASM to actual web developer job.

But i don't have that much time like in the past and that's it.

Vue.js   React.js   AngularJS   Vuetify   Vuex   CakePHP   Symfony   Laravel

PostgreSQL   MySQL   AWS   Google Cloud   vultr   digital ocean   xml

Sr Frontend Engineer

May 2021 - Apr 2022 • 1 yr

Octadesk • Remote

Here is the crazy thing i do in my life as a develop, migrate a old vuejs application to vue 2.6 + webpack 5 in a 30 day's.

I'm the man who saved our frontend application re-brand in 30 day's, it's very difficult but the main lesson i learned here is: is more simple to communicate with machines than people, Uncle Born lesson hã.

But i'm very gratefully for those of who's embrace the cause and fight on my side to do a great things in such a short time.

Vue.js   VueRouter   vite   JavaScript   TypeScript   Google Cloud   PostgreSQL   redis

Engineering Leader

Dec 2020 - Jul 2021 • 9 mos

Apponteme • Remote

I developer a frontend + backend in SaaS environment, for companies like amazon and Ey, i'm a principal engineering who's help the company and our software to pass in all the penetration tests that's is made by Israel team contracted by Ey.

This is like ladder for my professional career because i need to manage and deal with a lot of crazy things.

Here i need to learn about:

cryptography

isolation

security

We developed a symfony with isolated bundles on backend and a customized by configuration frontend using vuejs + quasar.

Vue.js   React.js   PHP   Symfony   MySQL   Tailwind CSS (Framework)   Quasar

Frontend developer

Aug 2020 – Feb 2021 • 7 mos

[Conexa Saude](#) • Remote

I developer a frontend in SaaS environment, this mean i developer a frontend that could be extensible for our company sell it to another companies.

We used css + css tokens, vue, scss, a lot of svg files integrating with spring boot api.

This environment have a lot of pressures but we're able to delivery in a time.

Vue.js   VueRouter   Vuex   Spring Boot   SCSS

Education

Instituto Federal do Rio Grande do Norte - IFRN RN

2010 - 2012

Secondary / High School Diploma (or equivalent), Informatica
